Lingesh Sashi Kumar

lingeshsashi@gmail.com | New Brunswick, NJ

Education

Rutgers University — School of Arts and Sciences Expected May 2030
B.S. in Computer Science and Data Science (CS&DS) *New Brunswick, NJ*

Bridgewater-Raritan High School 2026
High School Diploma *Bridgewater, NJ*

Experience

New Jersey Cybersecurity & Communications Integration Cell (NJCCIC) Jun 2025 – Aug 2025
Cybersecurity Intern *Summer Internship Cycle*

- Researched and analyzed security vulnerabilities across government networks and systems over a 3-month internship, supporting statewide efforts to identify and mitigate cyber risk
- Investigated emerging threats and attack vectors affecting public-sector IT infrastructure, documenting findings to support risk assessment and incident response readiness

Codestax Feb 2026 – Apr 2026
AI Intern *Spring Internship Cycle*

- Contributed to improving and simplifying the end-user experience of an AI-powered application over a 3-month internship through iterative testing and design feedback

Prince Martial Arts Sep 2024 – Sep 2026
Assistant Instructor & Head of Digital Operations

- Assisted instruction of martial arts classes for students across skill levels over a 2-year term, reinforcing discipline, technique, and safety
- Administered the school's website and social media accounts as head of digital operations

Certifications

- Microsoft Certified: Azure AI Apps and Agents Developer Associate — Aug 2026
- Microsoft Certified: Azure AI Engineer Associate — Dec 2024
- Microsoft Certified: Azure Data Scientist Associate — Jul 2025
- Microsoft Certified: Security, Compliance, and Identity Fundamentals — Jul 2025
- Microsoft Certified: Azure AI Fundamentals — Apr 2024
-

Projects

CampusOS | React, Node.js, Google Calendar API 2026

- Consolidated six academic workflows into CampusOS, a responsive full-stack web application spanning class scheduling, deadline tracking, calendar synchronization, textbook price comparison, grade forecasting, and academic planning
- Engineered automated data pipelines that parse natural-language input and syllabus content into structured, tracked assignments, grading schemas, and calendar-ready .ics exports

MarketPilot AI | Claude API, Python 2026

- Built a personal AI assistant using the Claude API to analyze real-time and historical market data and generate buy/sell recommendations
- Designed a predictive insight layer combining current market conditions with forward-looking trend analysis

Technical Skills

Languages & Security: Java, Python, SQL, Vulnerability Assessment, Threat Research, Risk Analysis, Security Compliance, IAM, Incident Response Fundamentals

Cloud, AI & Tools: Microsoft Azure, Cloud Security Fundamentals, Claude API, Prompt Engineering, Git, React, Node.js, Android Studio

Leadership / Extracurricular

Volunteer AI/ML Instructor
Community Temple Program

- Designed and taught an introductory AI/ML curriculum to middle and high school students, translating technical concepts into accessible lessons
